

WHAT YOUR DAY LOOKS LIKE

AT PEL'S POST

SUMMER

October to April

Summers in the northern Kruger are hot, with temperatures beginning to rise as soon as the sun is up. The day begins just before sunrise when birds and animals are usually at their most active, before the heat of the day forces them to retire to the shade.

WINTER

May to September

While days remain hot, dry and often sunny too, winter mornings and evenings can be very chilly. Our game drive times are adjusted to take advantage of the daytime temperatures and the sparser landscape makes for excellent wildlife viewing.
